

PHILIP JAMES
PRECISION ENGINEERS

JOB VACANCY

CNC - Setter / Operator / Programmer - Miller / Milling

Salary: £14.00 to £16.00 per hour.
Hours: Full time, 40 hours per week.
Closing Date: 30 September 2019

Role

Experienced CNC Setter / Operator / Programmer required to join our Milling section.

Operating since 1980, Philip James Precision Engineers provides CNC machining and affiliated services to market leading companies from our fully equipped and modern manufacturing facility.

Specialising in complex prototype and low volume high precision component production; we undertake all design, CAD/CAM, programming and machining work in-house to achieve best value for our customers, in terms of overall package, service and quality.

We currently have an opportunity for a fully skilled CNC Miller with 3/5 axis Hurco setting / programming experience to join our milling section.

Basic hours: Monday to Thursday 07:30 to 16:30 and Friday 07:30 to 12:30, with opportunities to work overtime.

Required Skills / Experience

- Experience of Hurco WinMax controls preferred or willing to learn
- Setup and operate machines with a minimum of supervision
- To work to correct tolerances and check own work during Production
- Meeting production targets and assisting with the production of various parts when required
